Context:
Small and Medium size Enterprises (SMEs) are an important driver for innovation and growth in the EU. At the same time, cybersecurity risks are becoming an increasing concern for SMEs. The EU-funded SMESEC project aims to address these concerns.

Approach:
The SMESEC consortium is proposing to develop a cost-effective suite of cyber-security tools. The suite supports SMEs in managing cybersecurity risks and improving their information security and privacy standards. The framework shall allow SMEs not only look at cyber-security as an obstacle but also as an opportunity for business.
